[BLR-927] SWB SSS Payment Flow — V1 Baseline Benchmark

BLR Platform runtime for the Payment Link (Static Web Biller) SSS manual-PRN flow · payment gateway (3DS) shown separately · baseline before the code enhancement

Ticket	BLR-927 · https://apnsolutions.atlassian.net/browse/BLR-927
Environment	Test — V1, before the code enhancement
Entry URL	`https://test-new-sss.billeroo.com/1722b098-aa14-4728-af69-e0803671d4c3/inputprn`
Measured	15 Oct 2026, 16:42–16:46 PHT
Runs averaged	4 (all paid and posted successfully)
BLR Platform steps	1. Open PRN input page · 2. PRN lookup · 3. Open consent · 4. Consent to TLPE · 5. TLPE to Confirm Payment · 8. Result to receipt
Excluded (gateway)	6. Pay to 3DS · 7. 3DS to Payment Result (Visa test card, 3DS Simulator → Approve)

BLR Platform runtime: 7.08 s on average (5.50–8.72 s across 4 runs), with the payment gateway excluded. The slowest BLR step is **Consent to TLPE** at 2.81 s (40% of BLR time). Including the 3DS payment gateway, the full flow takes 20.02 s, so the gateway accounts for 65% of what a payer waits.

BLR PLATFORM RUNTIME (AVG)
7.08 s
Median 7.05 s · gateway excluded

BLR FASTEST – SLOWEST
5.50–8.72 s
Spread 3.23 s

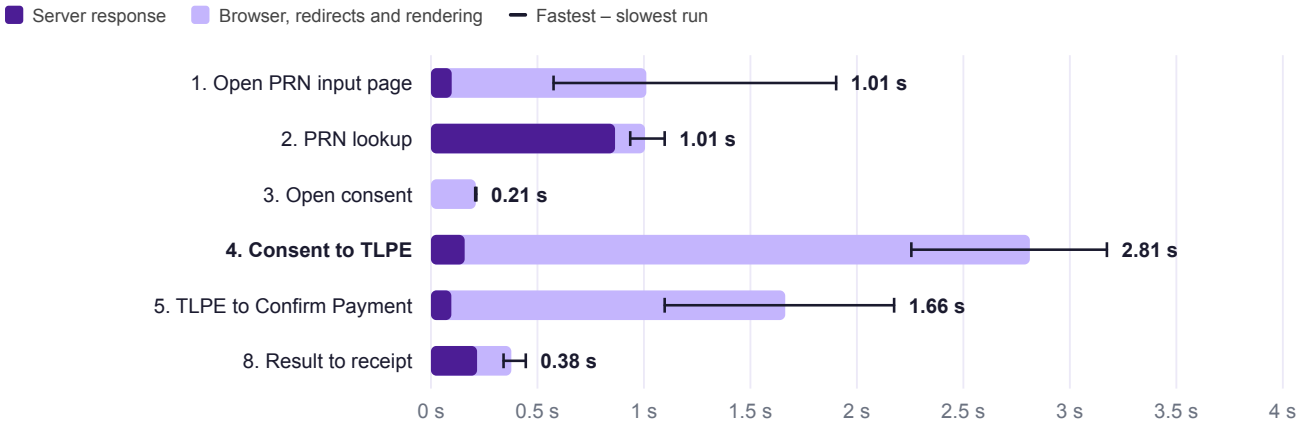

SLOWEST BLR STEP
2.81 s
Consent to TLPE · 40%

FOR REFERENCE: WITH 3DS
20.02 s
+12.94 s payment gateway

BLR Platform — average time per step

BLR ONLY

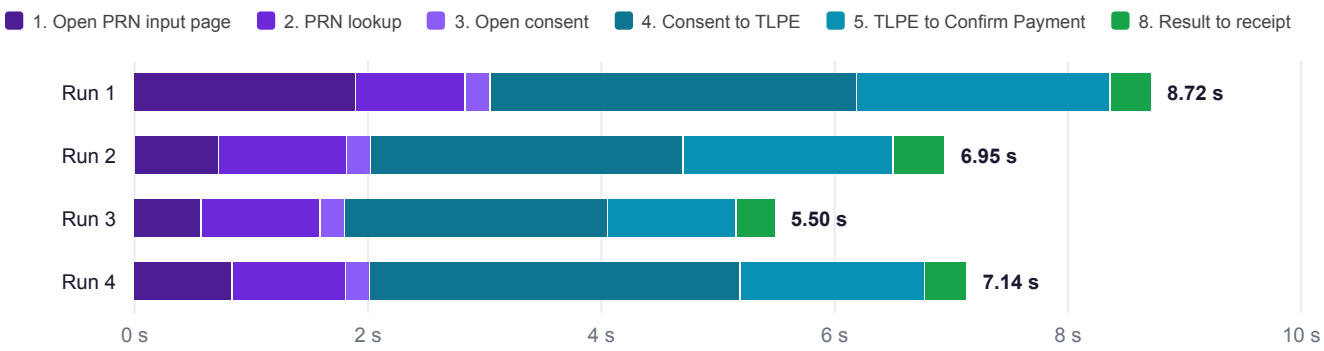

Bar = 4-run average. Dark part = server response (time to first byte); light part = page loading, redirects and rendering. Black line = fastest to slowest run. The slowest step is in bold.

BLR Platform — runtime per run

BLR ONLY

Each bar is one paid and posted transaction, built from its 6 BLR Platform steps in order.

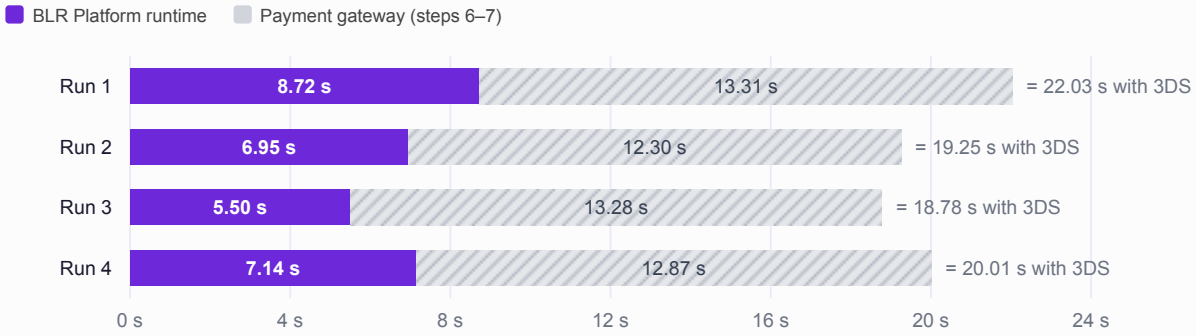

BLR Platform — step timings in detail (seconds) BLR ONLY

Each step starts at the click and ends when the next page is ready. Typing and form filling are not timed. Server avg is the time to first byte of the page the step loads; Open consent opens a pop-up, so it has none. Share is of BLR Platform runtime.

#	STEP	RUN 1	RUN 2	RUN 3	RUN 4	AVERAGE	MIN	MAX	SERVER AVG	SHARE
1	**Open PRN input page** Load /inputprn until the PRN field shows	1.90	0.72	0.58	0.84	**1.01**	0.58	1.90	0.10	14%
2	**PRN lookup** Next until the Payment Checkout Summary shows	0.94	1.10	1.02	0.97	**1.01**	0.94	1.10	0.86	14%
3	**Open consent** Next until the Consent pop-up shows	0.21	0.21	0.21	0.21	**0.21**	0.21	0.21	—	3%
4	**Consent to TLPE** Proceed until TLPE Customer Details shows	3.14	2.68	2.26	3.17	**2.81**	2.26	3.17	0.16	40%
5	**TLPE to Confirm Payment** Next (Visa) until the card form shows	2.17	1.80	1.10	1.58	**1.66**	1.10	2.17	0.10	23%
8	**Result to receipt** Click "here" until the Payment Posted receipt shows	0.36	0.45	0.34	0.36	**0.38**	0.34	0.45	0.22	5%
	BLR Platform runtime Steps 1–5 and 8, payment gateway excluded	**8.72**	**6.95**	**5.50**	**7.14**	**7.08**	5.50	8.72	1.43	100%

With vs without the payment gateway (3DS) REFERENCE ONLY

Steps 6 and 7 happen on the payment gateway (TLPE PAY, the 3DS Simulator and its redirects back), not on the BLR Platform, so they are excluded from the BLR runtime above. They are shown here so the full payer wait is still on record.

RUN	BLR PLATFORM (S)	PAYMENT GATEWAY (S)	FULL FLOW WITH 3DS (S)	GATEWAY SHARE
Run 1	**8.72**	13.31	22.03	60%
Run 2	**6.95**	12.30	19.25	64%
Run 3	**5.50**	13.28	18.78	71%
Run 4	**7.14**	12.87	20.01	64%
Average	**7.08**	**12.94**	**20.02**	**65%**

Payment gateway steps in detail (seconds) EXCLUDED FROM BLR

#	STEP	RUN 1	RUN 2	RUN 3	RUN 4	AVERAGE	MIN	MAX	SERVER AVG
6	**Pay to 3DS** PAY until the 3DS Simulator shows	2.92	2.65	3.11	2.82	**2.88**	2.65	3.11	0.72
7	**3DS to Payment Result** Approve + Submit until TRANSACTION SUCCESSFUL	10.39	9.65	10.17	10.04	**10.06**	9.65	10.39	0.07
	Payment gateway time Steps 6–7 (TLPE PAY, 3DS and its redirects)	**13.31**	**12.30**	**13.28**	**12.87**	**12.94**	12.30	13.31	—

Most of step 7 is browser redirects after 3DS (oppwa → TLPE callback → status page); its server time is only 0.07 s.

The 4 benchmark transactions

RUN	PAID AT (PHT)	PRN	MEMBER TYPE	TRANSACTION REF	BILL (PHP)	BLR RUNTIME (S)	WITH 3DS (S)	RECEIPT
Run 1	2026-10-15 16:42:40	OC250000001193	OFW	261015084215ZFV7229	20,700.00	**8.72**	22.03	● Payment has been posted successfully
Run 2	2026-10-15 16:45:11	OC250000001229	OFW	261015084447DFE9051	18,000.00	**6.95**	19.25	● Payment has been posted successfully
Run 3	2026-10-15 16:45:44	OC250000001274	OFW	261015084520GVR9941	36,000.00	**5.50**	18.78	● Payment has been posted successfully
Run 4	2026-10-15 16:46:18	OC250000001300	OFW	261015084554KCZ2427	14,400.00	**7.14**	20.01	● Payment has been posted successfully

Each total charged = bill amount + PHP 7.00 service fee (e.g. Run 1: PHP 20,707.00).

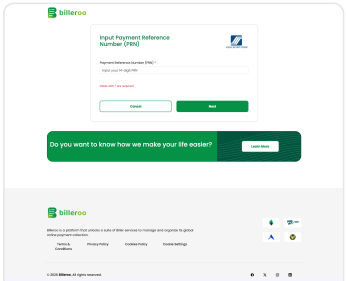

Payments that did not post (excluded)

Charged on TLPE (TRANSACTION SUCCESSFUL) but the SSS receipt showed **Payment Posting Failed**. All five happened between 16:28 and 16:41 PHT, just before the benchmark window, and are excluded from every number above. The next payment (Run 1, 16:42) posted normally, which points to a temporary SSS posting outage rather than a PRN or member-type problem. **Please check these references.**

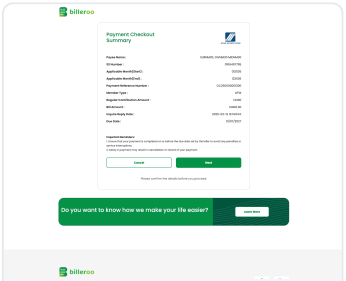

PAID AT (PHT)	PRN	MEMBER TYPE	TRANSACTION REF	BILL (PHP)	RECEIPT
2026-10-15 16:28:11	SC250000001915	Self Employed	261015082754TMO7399	9,120.00	● Payment Posting Failed
2026-10-15 16:37:53	SC250000002011	Self Employed	261015083717YIA7884	9,120.00	● Payment Posting Failed

2026-10-15 16:41:23	VC250000001517	Voluntary	261015084053CEA6293	9,900.00	● Payment Posting Failed

Evidence — Run 4 (PRN OC250000001300, txn 261015084554KCZ2427)

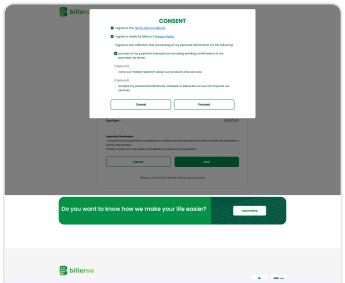

One screenshot per step, captured by the benchmark. Dashed frames are payment gateway pages. Every run is also recorded on video in `benchmarks/swb-sss-input-prn/videos/`.

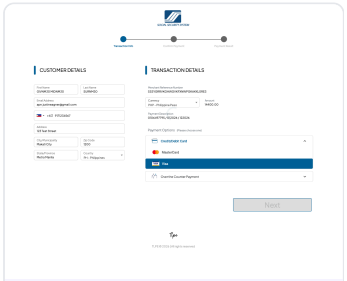

1. PRN input

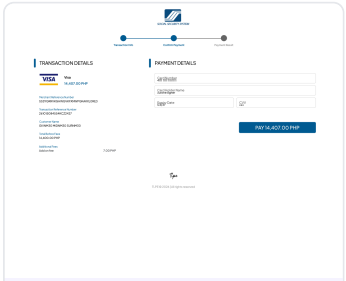

2. Checkout Summary

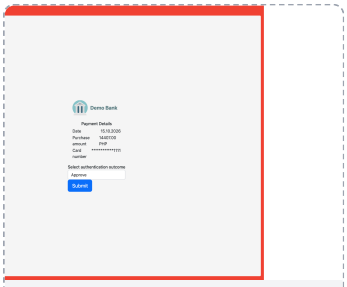

3. Consent

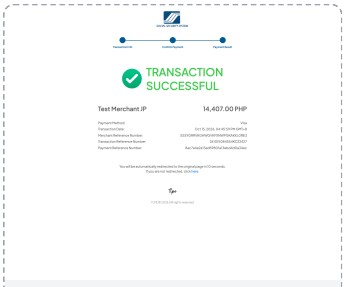

4. TLPE Customer Details + Visa

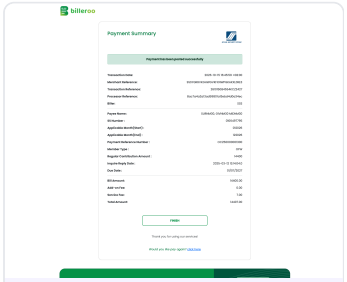

5. TLPE Confirm Payment

6. 3DS Simulator (gateway)

7. TRANSACTION SUCCESSFUL (gateway)

8. Payment Posted receipt

Method and notes

- **BLR Platform runtime** = steps 1–5 and 8: PRN input, PRN lookup, Consent, hand-off to TLPE Customer Details, TLPE Next to Confirm Payment, and the return to the Payment Posted receipt.
- **Payment gateway (excluded)** = steps 6–7: PAY → 3DS Simulator, and Approve + Submit → TRANSACTION SUCCESSFUL.
- **Fresh visitor each run:** new browser session with no cookies or cache.
- **Headed browser required:** in headless Chromium, TLPE shows "Sorry, something went wrong" after PAY and never reaches 3DS.
- **Only posted runs count:** if the receipt says Payment Posting Failed, the PRN is logged as used and the run repeats with the next PRN.
- **Possible bug found:** clicking Next on the Checkout Summary before the page finishes loading skips the Consent pop-up and goes straight to TLPE.
- **After the code enhancement:** run the same benchmark on V1 with `BENCH_LABEL=V1-enhanced BENCH_RUNS=4` and compare the BLR Platform runtime against this baseline.
